

Covert Privacy Policy

Privacy Policy

Last updated: May 7, 2026

Overview

Covert does not collect, store, sell, or share personal information.

Local Multiplayer Connectivity

Covert uses Apple's Multipeer Connectivity framework to allow nearby devices to discover and communicate with each other for gameplay purposes.

This communication occurs locally between participating devices and is not transmitted to external servers operated by the developer.

Data Collection

Covert does not:

- Create user accounts
- Collect analytics
- Use advertising identifiers
- Track users across apps or websites
- Store personal information on external servers

Device Permissions

Covert may request permission to access the local network in order to enable nearby multiplayer functionality.

Children's Privacy

Covert is not directed toward children under 13.

Changes

This policy may be updated in the future.
